CONTACT : Mr. Anil Daud

ACTIVITY : 4 KisanKing: AgriTech Platform for Farmers, Retailers & Agri Outputs 4 KisanKing is a pioneering AgriTech platform that connects farmers, agri input retailers, and farm produce aggregators, creating a seamless supply chain that benefits all parties involved.

KisanKing's Products & Services: For Farmers: Microclimatic Machines: Utilize AI to predict disease and pest outbreaks, enabling proactive measures and reducing crop loss. Crop Health Monitoring: Analyze crop images to identify nutrient deficiencies and suggest remedies for optimal growth. Precision Farming Tools: Optimize irrigation schedules and resource allocation, maximizing yield and profitability. Market Access: Connect directly with aggregators and ensure fair prices for produce. For Agri Input Retailers: Demand Forecasting: Predict product demand based on real-time data, optimize inventory management. Targeted Marketing: Reach farmers directly with relevant product offerings. Financial Services: Facilitate online payments and provide micro-loans to farmers. For Farm Produce Aggregators: Direct sourcing: Secure high-quality produce at competitive prices. Real-time Traceability: Track produce from farm to table, ensuring transparency and food safety. Market Intelligence: Access valuable data on market trends and demand. Value Creation for Farming Communities: Increased Yields: By utilizing KisanKing's AI-powered tools and data-driven insights, farmers can optimize their farming practices and achieve higher yields. Reduced Costs: Improved resource management and efficient input utilization lead to cost savings for farmers. Improved Market Access: Direct access to aggregators and fair prices ensure better returns for their produce. Reduced Risk: Predictive analytics and timely alerts help farmers mitigate risks associated with disease, pests, and weather. Enhanced Sustainability: Precision farming practices promote resource conservation and minimize environmental impact. KisanKing empowers farmers by providing them with the knowledge, tools, and resources they need to thrive in the modern agricultural landscape. By building a seamless and efficient supply chain, KisanKing is transforming the agricultural sector and creating a brighter future for farming communities.

ACTIVITY : We introduce ourselves as the most respected company in the field of protected cultivation technologies manufacturing and supplying GREENHOUSE structures like Poly House, Net House, Multi-span Structures, Tunnels (Single Span), Controlled environment growing structures, Solar Drying Tunnels, Pack houses, and its components, accessories, parts, etc. from INDIA.

Our journey began as a humble manufacturer of the accessories and fittings for the structure of greenhouse like Poly house, Shade net house, Insect net house, Solar drying tunnels, etc. Very soon Agrolt Solution Pvt Ltd carved a respectable lead position in the industry by virtue of its smart and innovative solutions for the pre-engineered structural components. Being the most preferred vendor for the majority of Greenhouse manufacturing companies gives us a unique advantage of learning from multiple sources and experiences. Enriching the experience by experience makes us the fastest growing company in the domain of Greenhouse Structure Manufacturing.

We have a talented and experienced team of technocrats and engineers in the field of Greenhouse structures. Equipped with automated and high precision metal working machinery and in-house dies-moulds design capacity we confidently deliver the exact requirements of various greenhouse structural needs. Our state-of-the-art manufacturing facility is located in the industrial area in Rajkot city of Gujarat which is considered to be an eminent engineering hub and globally renowned for its proficiency in steel and metal processing capabilities.

Our company started as a partnership firm in 2013 with the name Angel Solutions and in 2020 we were incorporated as a limited liability company. Please feel free to contact us anytime for any information from our side. Keeping pace with the ever-evolving technology, today The Agrolt Solutions Private Limited is synonymous with reliability and quality.

ACTIVITY : Welcome to AGROTIS TECHNOLOGIES LLP. , your trusted partner in modern agricultural solutions. With a rich history and a commitment to innovation, we are dedicated to revolutionizing the farming industry by providing high-quality, efficient, and reliable machinery for all your agricultural needs.

At AGROTIS TECHNOLOGIES LLP. , we understand the challenges faced by farmers today. That's why we have assembled a team of experts who are passionate about developing cutting-edge machinery that increases productivity, reduces labour, and optimizes resource utilization. We believe that by harnessing the power of technology, we can empower farmers to achieve sustainable and profitable outcomes.

Our extensive range of agricultural machinery is designed to cater to various aspects of land preparation in farming and animal husbandry. We offer state-of-the-art Rotary Tillers, Ploughs, Cultivators and Chaff Cutters, all crafted with precision and built to withstand the rigors of modern farming practices. Each machine is engineered to deliver exceptional performance, ensuring that you can achieve maximum efficiency while minimizing downtime.

What sets us apart is our unwavering commitment to quality. We utilize the finest materials and adhere to stringent manufacturing standards to produce machinery that is not only robust but also safe and environmentally friendly. Our team of skilled technicians conducts rigorous testing and quality checks at every stage of production, ensuring that every machine leaving our facility is ready to exceed your expectations.

But our dedication does not end with the sale. We have a comprehensive after-sales support system in place, with highly trained technicians who are ready to provide prompt assistance whenever you need it. We believe in building long-lasting relationships with our customers and ensuring their satisfaction throughout their ownership experience.

In addition to our products and services, we are committed to promoting sustainable agricultural practices. We actively research and develop innovative solutions that help conserve resources, minimize waste, and protect the environment. By choosing our machinery, you are not only investing in your own success but also contributing to a greener and more sustainable future.

Join us at AGROTIS TECHNOLOGIES LLP. as we embark on a journey to transform agriculture through advanced machinery and unwavering commitment to customer satisfaction. Experience the power of technology, efficiency, and reliability in every machine we offer. Together, let's cultivate a brighter tomorrow.

Sincerely Yours,  
TEAM AGROTIS

ACTIVITY : Bank of India was founded on 7th September, 1906 by a group of eminent businessmen from Mumbai. The Bank was under private ownership and control till July 1969 when it was nationalised along with 13 other banks.

The Bank has over 5000 branches in India spread over all states/ union territories including specialized branches. These branches are controlled through 67 Zonal Offices and 12 NBG Offices. There are 45 branches/ offices abroad which includes 23 own branches, 1 representative office and 4 Subsidiaries(20 branches) and 1 joint venture.

While firmly adhering to a policy of prudence and caution, the Bank has been in the forefront of introducing various innovative services and systems. Business has been conducted with the successful blend of traditional values and ethics and the most modern infrastructure. The Bank has been the first among the nationalised banks to establish a fully computerised branch and ATM facility at the Mahalaxmi Branch at Mumbai way back in 1989. The Bank is also a Founder Member of SWIFT in India. It pioneered the introduction of the Health Code System in 1982, for evaluating/ rating its credit portfolio.

Bank is providing credit facility to farmers and various Agriculture allied activities like, KCC loans, Dairy loans, Loans for Agriculture Infrastructure, Marketing, Food Processing activities, Value chains, FPO, FPC, SHGs

**ACTIVITY :** Chaff Cutter & Silage making is the equipment and solutions for animal feed - grass cutter machine, chaff cutter machines & food processor are must for the dairy farmer that needs an economical solution and excellent cost-benefit relationship. These chaff cutters have high productivity to make silage and recommended for daily feeding of the animals, chaff cutter for silage making with simplicity can be operated by tractor, Vidhata diesel engine as well as electric motor. Latest single row and double row forage harvesters also available on demand, ( )

These chaff cutters cut bajra, jowar, corn / maize, barseem, sugarcane, paddy grass, parli, Dry and wet grass, groundnut etc. Ideal for Dairy farms, mushroom farms, jute industries,

cocotrees, napier grass, wood stems etc for silage making, as silage process must complete in

total 16 Hrs, so it needs high speed chaff cutting

The fodder prepared with the help of these machines is easier to swallow and more digestible.

Model JF 2D AND 5D prepare excellent granules from maize and other crops.

**Type your MOST ADVANCED - GRASS CUTTER, SILAGE MANAGEMENT & PACKING MACHINE**

**WHAT IS SILAGE??** Silage-making is a fermentation process aimed at preserving forage in its wet state away from air. One is seeking to lose minimum dry matter and nutritional value and to avoid creating products toxic to the animal. Good silage is light brown in colour, has a sharp taste and little smell as its lactic acid content is right. It is very stable and can be kept for years if required. We call it **GREEN BANK** you own 24/7 source for feed **WHY SILAGE AS SURVIVAL FOR DAIRY??** A dedicated amount of feed and fodder is needed for the cattle to survive and to produce milk. Providing the right quantity of feed is a matter of concern for every cattle owner. India is facing an acute shortage of feed and fodder and its negative influence on the dairy economy is being discussed widely. The shortage of dry fodder is 35 per cent, estimates the national institute that is under the administrative control of the Indian Council of Agricultural Research. ... But with the acute fodder shortage, sustaining cattle has become extremely difficult in drought-affected areas [paragaph here](#).

Can pack all type of silage maize super napier jwari bajra maize cob wheat vegetable silage etc

vidhata silo packing machine components: if purchase full package 1. Silage guru chaff cutter 2. Elect motor / tractor / diesel engine optional available 3. Packing machine simple tech. Easy maintenance 4. Powerful hydraulic system run chopper, loader and compactor at same time technical specifications corn cracking technology for 9% protein silage cut sizes: 5mm and 13mm suitable for cows, goats & buffalo blades : easy sharpening silo pack silage test kit available benefits 60/30 kg bags, easy to handle and transport as per Indian conditions organic process no additives required to add increased milk yield by 30%\* high DM intake better milk quality by increased protein and fat save in concentrate feed as all maize grains cracked for absorption

**ACTIVITY :** Captain Polyplast Limited is an ISO 9001:2015 certified company established in 1997 which is promoted by the team of Agricultural Engineers. Captain Polyplast Ltd. is also listed with Bombay Stock Exchange (BSE).

Captain Polyplast Ltd. is at the leading position in production of various Micro Irrigation Systems and Greenhouse Structures for protected cultivation in the state and registered as Government Approved Supplier for Micro Irrigation Systems in various states.

Captain Polyplast Ltd. a manufacturing, exporting and trading company of supreme quality Micro Irrigation Systems and Protected Cultivation Structures including their components, HDPE Pipes, PVC Pipes, Column Pipes and Plumbing Pipes. Within a very few years, we have established ourselves as a prominent name in the industry. With innovative ideas and excellent quality products, and dedicated to serve better, Captain Polyplast Ltd. has registered its position as a reputed brand in the market. Our product range is most extensive and enough to cater a wide range of micro irrigation related needs. Supreme quality, reliability and durability with best services are what one can find with all our products. This is why our equipments are highly acclaimed not only in the domestic market but also in the export market.

Company gained unswerving trust among farmers only due to its best quality and prominent services. Therefore, Captain's Drip, Mini Sprinkler and Sprinkler Irrigation System are populated by farmers in Gujarat state since last 18 years. During the journey of our business success, we have got number of satisfied customers which are playing major role in marketing our produces among farmers.

After successful execution of the installation of systems all over Gujarat, company has decided to expand the market in other parts of the nation as well to develop overseas market. At present, company is supplying its products to almost each state of the country as well exporting to about 15 countries.

We are having required BIS registrations for the production and supply of quality product in the market.

Plain Laterals : IS:12786 with CM/L No. 7270367

Emitting Pipes : IS:13488 with CM/L No. 7580079

Online Emitters : IS:13487 with CM/L No. 3775276

**Pune - 412307****Maharashtra****CONTACT : Mr. Dhairyasheel Bawasakar**

**ACTIVITY :** Dr. Bawasakar Technology (Agro) Pvt. Ltd. is an agro-based organization that offers innovative technology and agro-products for the benefit of farmers engaged in organic farming. The organization was established in the year 1978 by Prof. Dr. Vinayak S. Bawasakar, an agricultural scientist with a staunch vision to serve the predominantly agricultural land of India. For over 40 Years, Dr. Bawasakar with his sheer vision, dedication, discipline and rigorous innovative abilities contributed to the agricultural sector by introducing result oriented technology and products that are affordable to the farmers. The organization's innovative flagship agro products are the Plant Functional & Technology products- Germinator, Thriver, Crop-Shiner, Ripener, Protectant-P, Prisom, Nutraton, Harmony, Cotton Thriver, Paddy Thriver & Kalpataru Organic Manure that have benefitted lakhs of farmers for over four decades by giving high quality bumper yield. Dr Bawasakar Technology transformed traditional agriculture crops with low cost input (LCI) to high value added cash crops (HVACC) like vegetable, fruit & flower crops. Desert & barren land of Rajasthan, Bhuj & Kutch successfully grow Pomegranate, Isabgol, Cumin etc. Utilizing natural, indigenous resources, diversification of barren & waste land to Hi-tech Horticulture & floriculture projects is Dr. Bawasakar Technology's goal.

Dr. Bawasakar Technology (Agro) Pvt. Ltd. is continuously engaged in the research and development of sustainable organic farming technologies. The organization offers pioneering knowledge sharing initiatives through the monthly magazine 'Krishi Vidnyana'- a magazine for farmers, scientists, teachers, professors, seminars, exhibitions and workshops shares the successful experiences of fellow farmers.

The organization has its footprint also in the field of Biotechnology and has cultivated the tissue culture of banana (G9 variety). Prof. Dr. Bawasakar developed Siddhi-Vinayk Moringa (Drum Stick Crop) that grows on relatively barren land. Moringa fetches high value in Indian & foreign export markets and is known to have high nutritional and medicinal value. Our nursery has its very own scientifically and in house researched variety of plants.

The organization has also forayed into manufacturing and trading of allied agriculture products such as farming tools & equipments, battery operated spray pumps.

ACTIVITY : Genus Breeding India ( ABS India ) is part of Genus PLC the world's leading provider of bovine genetics and reproduction services, marketing in nearly 80 countries around the globe. Genus Breeding India Pvt Ltd. is a fully owned subsidiary of Genus PLC (listed on the UK stock exchange) and was established in early 2010-11. Through Genus extensive research and development programmer, its cutting-edge technology is being used to maximize the potential of dairy farms throughout the world.

Genus Breeding India ( ABS India ) is part of ABS Global, a division of Genus plc. Worldwide Genus PLC is the owner of ABS and PIC, the two largest companies in bovine and porcine genetics respectively. Genus PLC owns Promar International, the leading livestock consulting [href=https://gauravtiwari.org/types-of-online-bonuses-in-casinos/company](https://gauravtiwari.org/types-of-online-bonuses-in-casinos/company) in the world.

Genus Breeding India ABS India has also entered into a production JV with Chitale Dairy situated in Maharashtra of production of semen from the selected elite bulls in India through Chitale Genus ABS (India) Pvt. Ltd. ABS India adopts its International standards for selection of bulls for semen production with regards to genetics and health standards. ABS India has also started producing and marketing semen produced out of the live bulls imported from U.S.A. for the first time in the country. ABS India has a robust ET programme for the semen production from bulls born through embryos imported from North America and genomically.

In 2017, ABS India deployed Genus IntelliGen Technology, in India and started first bovine semen sexing lab in the country at its Brahma Genetics [href=https://www.lovelytelugu.com/summer-health-tips-in-telugu/Facility](https://www.lovelytelugu.com/summer-health-tips-in-telugu/Facility), Chitale Genus ABS India Private Limited, near Pune in Maharashtra.

With IntelliGen, we are providing sexed genetics for breeds like Holstein, Jerseys & indigenous breeds like Sahiwal, Red Sindhi Gir, along with crossbreeds and buffaloes (Murrah and Mehsana) for the first time. We are offering 21st Century technology which leads to more good quality heifers, higher profits, and therefore, a better and improved way of life for farmers. Check [href=http://mylenders.com.au/mylenders](http://mylenders.com.au/mylenders) for financial details.

The recently launched Genus IntelliGen Technology process to develop sexed bovine genetics does not subject cells to the high pressures, electric currents and shear forces. The result is a product that helps customers maximize their profitability and reach their end goals in a fast and efficient manner.

For more information on Genus IntelliGen Technologies, please visit [href=http://www.genusplc.com/www.genusplc.com](http://www.genusplc.com/www.genusplc.com). To learn more about Sexcel sexed genetics visit [href=http://www.abssexcel.com/www.abssexcel.com](http://www.abssexcel.com/www.abssexcel.com).

**ACTIVITY :** Making of Growers Flower Council Of India (GFCI).

Blessing in disguise has never been before so true for the floriculture industry than today! Covid19 pandemic has created VUCA situation globally and locally. What is VUCA? Volatile, Uncertain, Complex and Ambiguous! Isn't it appropriate? The prospectus and survival of our industry is at the stake! The industry; which has thrived well until this year due to largely big fat weddings, grand social gatherings, festivals etc. has suddenly halted!

What do we do? Look at government for support the State governments and central government is phenomenally tied up to contain the spread of this crazy Corona virus and literally have no time to attend the industry which is so miniscule in the size n revenue! So do we stop growing flowers? Do we give up and put flowers in dustbins? Do we allow cattle to graze in greenhouses? The situation by end of March and then continued in April was devastating. However; there was a group of professionals n growers who did not accept to bow down to the situation and decided to establish a springboard a sound platform to ensure the existence of Flower Industry of India!

The whole idea of bringing each and every stakeholder of the industry was conceptualized; with the help of group who had decided to bounce back, first on paper and then presented to growers, professionals, experts and stalwarts of Indian Floriculture Industry. Everyone responded with strong urge and willingness to join hands together. The result . Today we have established a milestone in Indian Floriculture Industry with Growers' Flower Council of India, a company approved by Govt. of India with the goals of flower promotion and sustainable floriculture growing whether it is protected or open field. Soon GFCI will launch its activity chart and plan of action in this direction. We congratulate Mr. Srikanth Bollapalli (President of GFCI) and Mr. Narendra Patil (Vice President of GFCI) for their valuable inputs to come this dream true.

CONTACT : Mr. Prasad Rajguru

ACTIVITY : Integrated aquaculture module and multi-stakeholder engagement is the way forward to reduce poverty, ensure food security, enhance production, ensure better productivity and build resilience

Jaljeevika InfoTech is a farmer collaborative platform to install the value of integrated aquaculture models, build a sustainable value chain for the growth of the rural economy, empower micro-entrepreneurs through scaling impact through data, building Brand value of local systems, as a co-creation model.

Jaljeevika infotech is building an ecosystem to engage all value chain stakeholders toward creating a resilient, innovative, collaborative and empowering platform for millions of small and marginal farmers. We are using technology as a tool to scale grassroots innovations, creativity and collective process for building norms across the value chain. We are open to exploring and integrating all deep tech tools like AI/ ML, Blockchain, Data Analytics, IoT, etc. as an enabling system to scale a web of solutions.

As a process, we are developing a system to include quality norms across the aquaculture farming segment so that traceability and certification get linked to producers, input providers, and at the consumer end as a sectoral norm rather than affordable preference.

Jaljeevika infotech is a team of societal well-being innovators, aquaculture practitioners, technology, and social entrepreneurs with a vision to ensure well-being and prosperity.

**ACTIVITY :** Founded in 1982, Udyogi has been a pioneer in PPE & Industrial Safety Solutions in the country. We ventured into the Agri business in 2011 by manufacturing world-class Cylindrical Drippers. Over the years, we have added to our product portfolio in Agri such as Flat Drippers, Screen, and Disc Filters. All these products are manufactured in-house using cutting-edge technology and world-class equipment as well as infrastructure.

Indian economy is predominantly agricultural. According to the government's directives, we need to boost our yield per hectare. This target has created a huge requirement for drip irrigation facilities. We have increased our dripper manufacturing capacity and set it at 100 crores annually. We focus on building value-added and highly advanced solutions for the drip irrigation industry worldwide. With its continuous innovation, Udyogi Agri constantly strives towards achieving excellence in this space.

Udyogi has a strong presence across the country along with a sales team spread across India. Leading towards organizational excellence through comprehensive drip irrigation solutions and services has always been an insignia in our culture. Rising to the task of attaining distinction, all our teams across all divisions combine their knowledge and expertise to take Udyogi to newer heights.

Today, we boast of building an array of world-class Agri-solutions that offer great customer benefit & became a popular choice amongst users. The market has truly embraced the motto of More Crop Per Drop & generated high demand for Udyogi Agri Products.

We are a knowledge-driven organization where our growth in the drip irrigation industry is pegged on collective continuous research and innovation. Our excellent product quality is a result of lean thinking and a strong corporate structure powered by outstanding human capital. The knowledge of our team members combined with new ideas and current technology trends enables us to configure the optimal solution for all drip irrigation needs.

At Udyogi, we empower our workforce to do extraordinary things with their ingenuity and agility. As an organization, we aim to prioritize innovation. We are now keen to make innovation' the language, the behaviour definer, the culture, and the soul of the entire organization.

Years of experience in this industry have endowed us with the insights to better understand the needs of both the drip-line producer and the end-user. This adds an extra edge to our state-of-the-art production lines that cater to the diverse and complex demands of our customers while addressing all market needs.

Our products show what cutting-edge innovation can achieve. Our product line shows excellent quality, durability & longevity. Udyogi Agri is the effect of continuous innovation that is working for humanity.

ACTIVITY : Krushi India Corporation established in the year 2015. Let's have a great privilege to introduce our self as The Quality Manufacturer of Organic Manure.

A New Idea for Successful farming

Our aim is to increase the Fertility of Land and Agricultural Productivity

We Believe in Quality Product

We have an established advanced infrastructure. Our processing unit is installed with latest machines and innovative tools so that the products are manufactured with utmost ease. These machines are regularly serviced for hassle-free operations and are upgraded in compliance with the prevailing technological advancement. Moreover, we also ensure that all the processes are completed at our infrastructure in a hassle free manner.

As we are quality centric firm, we make all our efforts to maintain consistent quality of our CALSIPHOS BIO NPK, ORGANIC MANURE, PROM, MAGNESIUM SULPHATE, BENTONITE SULPHAR 90%, MICRONUTRIENTS, ZYME etc. To ensure optimum quality of the products, we have established an advanced quality testing unit that is facilitated with latest testing tools. Also, our quality controllers test the entire product range at every stage, right from the procurement of raw material to final dispatch. We conduct quality test on different parameter to ensure the quality of the products before supplying to the clients.

Because of its Quality Consistency and Cost-Effectiveness, 'CALSIPHOS' has received an awesome response from the world of Farming. And 'CALSIPHOS' is now the Quality Brand of Gujarat.

Our team of workers is dexterous and dedicated towards the goal of the organization. We have administrators, Dealers, warehouse personnel, transportation personnel, quality controllers, packaging staff and sales executives. They are well versed with their individual work and committed to our customers for providing them with high quality product. We have a reliable vendor base and their track records are constantly checked by our professionals for delivering products in tune with the international standards and prevalent market trends.

Our mentor, Mr. Krupesh Patel, is the constant source of inspiration for the organization. His rich knowledge base has enabled us to achieve heights of success in a short period of time.

Krushi India Corporation has always believed that the people and the community within which it operates are the cornerstones for its success and as such is actively involved in Corporate Social Responsibility (CSR) activities aimed at social welfare.

We are supplying our products to the Government of India.

**CONTACT : Mr. Sambhaji Patil**

**ACTIVITY :** Established in 1991, Laxmi Pumps Private Limited has been producing a range of submersible pumps with great quality and excellent service. A name that shines in the market of submersible pumps is LADA Submersible Pumps. LADA is the brand under which our products are manufactured and marketed. As of today, Laxmi Pumps Pvt. Ltd. manufactures LADA Submersible Pumps exclusively.

Laxmi Pumps Private Limited is an ISO 9001:2008 company and has received an overwhelming appreciation across the nation for its premium quality pumps. The pumps are manufactured with unparalleled technology and efficient workforce due to which the company has earned the reputation of being the producers of the most reliable and energy efficient pumps.

Our team of industry experts and efficient engineers never hesitate to go the extra mile to create something new, offer 100% satisfactory products to the customers and take this business to new heights. We have always worked hard to deliver the products of the highest quality and novelty and we are glad to continue this tradition endlessly.

We focus on delivering energy efficient pumps that will have optimum performance and less power bill. With a veteran research and development team, we always look forward to presenting something groundbreaking all the time. We focus on making our product more user-friendly, which can undergo customization easily to cater your unique requirement. The company has established the highest standards to ensure the quality of the products, which have become the benchmark in the industry.

As a part of novelty, we have created a team of people that are responsible for the research and development of the products. The implementation of modern technologies like CAD software and flow simulation software further gives us an advantage. Along with that, we have seamlessly integrated IT infrastructure with ERP to ensure the streamlining of the manufacturing processes. The implementation of the cutting-edge management techniques like 5'S', Kanban, Kaizen etc. augments the production quality and makes us deliver products which are customer-centric.

As a leading submersible manufacturer, we believe an excellent quality product deserves a marketing strategy of the same mettle. With the help of our well-defined strategies, we have been successful in creating a strong presence in Maharashtra, Karnataka, Telangana, Kerala, and Andhra Pradesh. We have established a nexus of 500 dealers in Maharashtra alone which has made us one of the most sought-after brands.

ACTIVITY : Ascenso is an [href=https://ascensotyres.com/products/industrial-construction/off-highway-tyre](https://ascensotyres.com/products/industrial-construction/off-highway-tyre) brand owned and promoted by Mahansaria Tyres Private Limited (MTPL). It is the third such venture by the renowned Mahansaria Family. In their journey of more than three decades, they have built two leading OHT tyre brands with global footprints.

MTPL builds and benefits from the experience, knowledge, and successful track record of the father-son duo, Ashok Mahansaria and Yogesh Mahansaria, the promoters and owners of MTPL.

MTPL has set up a greenfield off-highway tyre manufacturing plant in Panoli, Gujarat (India). The state-of-the-art facility, spread over 127 acres/ 55,30,000 Sq.Ft, has a manufacturing capacity of 70,000 MT built in two phases. The phase-1 capacity is 40,000 MT, and the phase-2 capacity is 30,000 MT.

Ascenso, as a brand, caters to the needs of the following key global segments: [href=https://ascensotyres.com/products/agriculture/Agriculture](https://ascensotyres.com/products/agriculture/Agriculture), [href=https://ascensotyres.com/products/industrial-construction/Industrial](https://ascensotyres.com/products/industrial-construction/Industrial) & Construction, [href=https://ascensotyres.com/products/earth-mover/Earth-Mover](https://ascensotyres.com/products/earth-mover/Earth-Mover), Material Handling, and Forestry. In our journey over the last 3 years, we have released and added more than 600+ sizes to our portfolio. Ascenso is now distributed in over 90 plus countries. We not only offer a wide range of tyres across the applications but also customize solutions to suit specific customer requirements or applications. Our aim is to be present in all global markets, and every step forward brings us closer to our vision of becoming the most preferred brand in the Off-Highway Tyre Industry.

**Pune - 411037**

**Maharashtra**

**CONTACT : Mr. Rahul Ji**

**ACTIVITY :** The Maharashtra Agro Industries Development Corporation Ltd (MAIDC) was established in 1965 to facilitate the modernization of the agricultural sector in Maharashtra, India, through mechanization. MAIDC is registered under the Companies Act, 1956, and it has played a significant role in empowering the farming community by increasing agricultural productivity. The company's primary objectives include providing farmers in Maharashtra with high-quality fertilizers, pesticides, agro engineering implements, and animal feed at competitive rates and when needed. Here are some key activities and facilities associated with MAIDC:

**Manufacturing of Fertilizers:** MAIDC is engaged in the production of granulated mixed fertilizers (NPK) in various proportions at its factories located in Pachora (Jalgaon District), Jalna, Nanded, Wardha, Kolhapur, and Rasayani (Raigad District). These fertilizers are sold under the Krushi Udyog (KU) brand.

**Pesticide Formulation:** Through its subsidiary company, Maharashtra Insecticides Limited (MIL), MAIDC formulates pesticides at its plants in Akola and Lote Parashuram (Ratnagiri District).

**Agricultural Engineering:** MAIDC operates an agricultural engineering facility in Chinchwad, Pune, where it manufactures KRUSHIVATOR, a tractor-drawn implement designed to assist farmers in their agricultural activities.

**Animal Feed Manufacturing:** The company has an animal feed manufacturing unit located in Chinchwad, Pune. It produces various combinations of nutritious animal feed products and can customize them based on specific requirements.

**Food Processing:** MAIDC has a small unit in Nagpur that produces fruit juices, squashes, syrups, jams, ketchups, and other food products under the brand name 'NOGA.' This brand was initially associated with the Nagpur Orange Growers Association and was later taken over by the Maharashtra Government and entrusted to MAIDC in 1972.

**Headquarters and Regional Offices:** MAIDC is headquartered in Mumbai and operates through twelve regional offices located across different regions of Maharashtra, including Ratnagiri, Kolhapur, Nashik, Jalgaon, Pune, Aurangabad, Nanded, Osmanabad, Akola, Amravati, Nagpur, and Chandrapur.

**State Nodal Agency:** The company has been designated as the State Nodal Agency by the Ministry of Food Processing Industries, Government of India. In this role, MAIDC evaluates and forwards various proposals from entrepreneurs seeking assistance under different government schemes. It also assists entrepreneurs in project preparation and area selection.

**Food Park and Flower Auction Centre:** MAIDC has developed a Food Park at Butibori near Nagpur, providing common infrastructure facilities for small to medium food processing units. Additionally, the company is in the process of setting up a Flower Auction Centre in Mumbai.

Overall, MAIDC plays a vital role in supporting agriculture and agro-based industries in Maharashtra, with a focus on enhancing agricultural productivity and promoting food processing and related activities.

## MIT ADT UNIVERSITY PUNE

Rajbaug Campus, Loni Kalbhori  
Pune – 412201, Maharashtra

✉ ashok.todmal@mituniversity.edu.in  
🌐 <https://www.mituniversity.edu.in>

**CONTACT : Mr. Prof. Ashok Todmal**

**ACTIVITY :** MIT ADT University: MIT Art Design and Technology University has been making concerted efforts for taking a leap towards world class education. It is amongst the leading Government recognized Private University, within the ambit of the renowned MIT Group of Institutions, Pune. MIT ADT University is a multi-disciplinary university, which is famous for its sprawling lush green campus a picturesque location, spanning over the large area of 125 acres. University campus, serenity of Mother Nature and aesthetically spread on the banks of Mula-Mutha river.

The University is driven by the vision of delivering the world class value-based education and Holistic development of the student's personality, enabling them to transform themselves into a Future Global Leaders. The courses being offered are strategically planned and meticulously designed in view of the expectations and requirements of the industries. Our course curriculum and pedagogy are more focused towards giving complete Industrial exposure and hands-on practical experience to our students and developing industrial leaders out of them. Currently 2800 + students are enrolled in the MIT ADT University every year which is well equipped, with the adequate infra structural facilities.

MIT ADT University had won several accolades in the recent past includes Best Campus Award by ASSOCHAM in 2017 and Best private state university by better India Education Award in 2018. Twenty plus credits are given for campus to corporate transformation and involvement of separate schools like MIT School of Holistic Development and MIT School of Corporate Innovation & Leadership where they play a key role in the transformation of their personality and imparting the right skill-sets which are required in the corporate.

**MIT College of Management:** MIT ADT University's, College of Management was established in the year 2007, with a view to impart sector specific, value-based education in the field of management including Agri and Food Business Management, Project and Construction Management, Executive Education for working professionals. MIT ADT University's, College of Management is a unique institution where luminaries like Late Dr. A. P. J Abdul Kalam, Dr. Vijay Bhatkar, Dr. Raghunath Mashelkar, Dr. Abhay Firodia, Dr. B. N. Kalyani, Mr. Shishir Joripura, Mr. Ashok Kataria, Mr. Satish Magar, President CREDAI, Mr. Vikas Dangat, M.D, S.V. Group of Companies, Mr. Deepak Vora, PM advisor, Hanuman Gayakwad, BVG India Private Ltd. and many more eminent dignitaries have visited and recognized the institute as an international center of education. MIT ADT University's, College of Management has world class infrastructure that facilitates excellence in teaching and in other professional activities.

MIT ADT University's, College of Management also ensures building a resilient connect with the industries not just for outstanding placements, but also to modernize the course curriculum for all the courses as per the industry requirements. We also have alliances with foreign universities and institutions to fortify the student exchange programmes and collaborate for faculty exchange and research. Recently MIT ADT University's, College of Management has signed more than 50+ MOU's with industry of different domains that would help not only our students but also faculties and industries in return. The University / Institute encourages entrepreneurship and has an Atal Incubation Centre and we mentor the students who aspire to become entrepreneurs.

The diversity of options in MIT ADT University's, College of Management's curriculum is complemented by a breadth of activities outside the classroom. Every student finds ample opportunities to participate in and contribute to a variety of co-curricular and extra-curricular activities. World class library, computing and other educational and recreational facilities aid and enrich the process of learning. The 4500 plus strong network of the alumni, its ambassadors, spread all over the globe, holding leading positions in industry and academia alike, are a testimony to the Institute's focus of nurturing individual actualization and the pursuit of excellence.

From the day of its inception, MIT ADT University's, College of Management nurtured a dream to become a leading management Institute with a global vision. Today the dream has become a reality as MIT ADT University's, College of Management academicians and students alike have gained due recognition worldwide for their academic and professional excellence and contributing towards the society. MIT ADT University's, College of Management has constituted the Start-up and Innovation Cell to create the platform for the students by providing them an opportunity to interact, learn and network with a multitude of people which includes investors, venture capitalists, industry experts, and other aspiring entrepreneurs. We at College of Management at Undergraduate Level introduce BBA, BCA and B.Com (Honors-Economics) specialization Programs. All these Programs are Full time with 3 years' time duration. And at Post Graduate level MBA, M.Tech, programs in all specialization.

**Highlights of College of Management State-of-Art Infrastructure** with all modern amenities Graded AA+ by Career 360 Business School Ranked in top 50 Business schools in India Relevant Value additions in the form of value added certifications are scheduled to enhance the domain knowledge expertise. Guest lectures organized by college are great knowledge sharing sessions where eminent people working in respectable positions in Corporates come and share their knowledge. We call faculties from XLRI, IIM's and ISB's who come and share their experience and knowledge and interact one to one with our students. Teaching pedagogy includes student-centered approaches such as problem - based learning, case studies, role plays are a powerful way to engage students, stimulate interest, and foster deeper learning. More than 1000 Alumni across the world with one fifth holding CXO positions in top companies like Deloitte, HDFC, Mercedes Benz, DLF Research and Consultancy cell: Benefits the students to work on the Industry sponsored Research and Consultancy Live Projects Innovation and Startup cell: Organize the special mentorship and training Related to the Ideation, Rapid Prototyping and the Strat-up and Entrepreneurship practices. MIT College of Management has been Ranked No.1 in Times Top Ranking 2021 in Emerging BBA Institutes Placement & Ranked 7 as Top Emerging BBA Institutes

CONTACT : Mr. T. Prem Kumar

ACTIVITY : Sahasra Crop Science Pvt. Ltd., is a prominent sustainable agri-inputs company in India. Our business was founded in 2013 and since then has developed into one of India's most well-known agriculture enterprises. Our goal is to produce and market environmental friendly organic agriculture products that are rich in organic carbon compounds and highly effective nutrients that improve soil health and foliar nourishment for every crop.

We are proud of our factories, which have a yearly production capacity of one million litres. We have a proven track record of creating high-quality agri-inputs that have aided Indian farmers in delivering bountiful crops. Also, we have received compliance certificates from a number of regulatory organizations, like APEDA, CONTROL UNION, DSIR, FSSAI, OMRI, and TUV.

Our R&D Centre is recognized by the Department of Scientific and Industrial Research (DSIR), Ministry of Science and Technology, Government of India. Our world-class laboratory facilities and technologies help us to continuously develop new products for the benefit of agriculture. We are committed to supporting research fellows in their projects and offer practical classes at our Centre. We have established excellent linkages with State Agricultural Universities, National Agricultural Research Institutes, Krishi Vigyan Kendra's (KVK) and other reputed institutions in other parts of the world for various research projects.

We have a solid organizational structure and a group of highly skilled and seasoned specialists at our disposal. For the purpose of acquiring new information and disseminating it, we also support a cooperative approach.

Our ambitious future strategy calls for boosting our market share, adding new items, and increasing our production capacity. With your support, we are convinced that we can accomplish these objectives and support Indian farmers in realizing their full potential.

✉ executive.operations@sm-  
engineering.co.in

**Coimbatore - 641025**

🌐 sm-engineering.co.in

**Tamil Nadu**

CONTACT : Mr. Hiran Shah

ACTIVITY : SAMUDHRI MAA Engineering is manufacturer of Industrial type Air conditioners that are used in the dusty environments of a sorting machine rooms. These AC's are designed with special Inlet Air filter having large surface area for dust collection along with special type of cooling coil keeping in mind the dusty environment of a sortex machine room area.

The coolers are designed to be kept outside the Cabin of the machine room saving precious work area space. This also enables to do preventive maintenance activity without disturbance to production. The INLET Airfilter is also positioned at bottom level for easy access to cleaning.

The Coolers are available in different capacities to suit various room sizes. The coolers are designed to work in the rugged and dusty environs of grain sortex machine rooms. The units need minimal maintenance and these activity can be performed by unskilled labour. The cooler body is made up of Mild steel sheets which are laser cut and CNC bend and are finished with powder coating. The cooling and Condenser coils are made of Copper tubes and Aluminium fins having high heat transfer efficiency. The non clogging type design of the cooling coils ensures long and efficient periods of cooling and extends the dust declogging period by 10x compared to Coolers available in the market. The cold air is circulated inside the Sortex machine room cabins with the help of double Inlet forward curved blowers having better efficiency at back pressures. The condensers are cooled with the help of 2 nos fans for better heat transfer efficiency. The cooler uses high efficiency hermetically sealed piston type / scroll compressors. The cooler is fixed with a digital temperature indicator cum controller and the probe is located at the return air duct of the cooler thus enabling controlling of Cabin temperature..

**SAVE GRAIN ADVANCED SOLUTIONS PRIVATE LIMITED****531**

Flat No. B-302, Capital Apartment, Dadova   ✉ ksharma@savegrainbags.com  
Savilaram Ranavare Path   🌐 www.savegrainbags.com

**Pune - 411045****Maharashtra**

CONTACT : Mr. Kushal Sharma

ACTIVITY : We are pleased to introduce the Hermetic Storage Solution named as Save Grain Bags ( Organic Storage ) and about various advantages and applications of Save Grain Bags for the storage of Food Grains, Pulses, Millets, Spices, Flour, Dry Herbs, Vegetables Seeds, Crop Seeds, Dry fruits, Jaggery, Tea and Coffee beans etc. and protect grains from insects infestation, Oxidation and Aroma loss.

How these bags work? These bags are having 5 layers and one of the layers is of EVOH (Ethylene-Vinyl Alcohol)resin. This EVOH resin has the highest oxygen barrier property. Due to this oxygen barrier layer, these bags do not allow outside oxygen to come inside the bag. Already existing insects inside the bags inhales oxygen and gives off CO2. As a result, CO2 level increases and kills the living insects. Since there would be no further oxygen coming inside, so there would be no insects growing further. As a result safe storage of Food Grains without insects infestation. Along with the bag we provide two reusable cable ties to close the bags.

In other words, these bags create an anaerobic environment inside the bags, so as a result their is no infestation, no moisture loss, no aroma loss and self life of product increases

**ACTIVITY :** 3 Manufacturers of Organic Agri Inputs 3Although awareness about organic and sustainable farming is developing among cultivators, quality organic inputs to substitute chemicals are inadequate. Most of the times, the required product is either not available or one cannot ascertain its quality.

To supply quality inputs in affordable price to farmers, the group came up with SONKUL AGRO INDUSTRIES PVT. LTD. establishment dealing exclusively into production of organic inputs. We supply organic manures and fertilizers; biofertilizers, biopesticides, organic products for plant protection, various oiled and deoiled cakes, bio control agents, plant growth promoters, insect traps and many more products for integrated pest, disease and nutrient management. We also manufacture quality organic inputs for lone and kitchen garden. With strict quality control policy, we are probably the only supplier providing all types of non chemical products under one roof.3 Laboratory Services 3Integrated nutrient management (INM) is a well-accepted approach for the sustainable management of soil productivity and increased crop production. To implement this approach successfully, well-equipped testing laboratories are needed in order to analysis the soil, water and plant as well as nutrient supplying capacities of various sources.

Accurate and timely analysis helps in determining the precise requirements of plant nutrients so as to manage their supply through various sources.

A state of the art soil, water, plant and fertilizer analysis laboratory was established and started providing analytical services to farmers of Nashik district. With the help of trained qualified staff, modern analytical instruments and timely service, the geographical reach of laboratory now crossed state borders. Thousands of farmers are availing laboratory services and are satisfied with the guidance.

Along with the accurate analysis of samples, we provide expert guidance on selection of right kind of fertilizer, its quantity, time and method of application. Our fertilizer recommendation service based on analysis report is gaining popularity among the farmers and it is helping them not only to minimize cost of inputs but it is also proving helpful to get desired yield and quality of the produce without affecting soil or environment health.3 TECHNICAL SUPPORT 3Being a professionally managed house, we have empanelled leading scientists from various fields of agriculture and horticulture continuous interaction with them helps us to maintain quality standards and developing new products for this dynamic sector.

We have close association with reputed institutes and scientists in the area of agriculture, horticulture pest management and production of bio-control agents. We take utmost care in every aspect of production. With their qualification, experience and association, we assure quality products and service. In addition to this, the organization has established R & D support to improve and develop technology, raw material and inputs, processes and practices, and application with a view to secure greater productivity, efficiency, rationalization and reduction of costs.

ACTIVITY : SSGOLD industries was founded in April 2012 by Mr Manish Aagrwal with the support of his mother Sakuntala Agarwal. Our role model and inspiration for this has been Late Narender Kumar Aggarwal father of Manish Agarwal. It is because of his visions and missions to do something in agriculture the duo of Son and Mother led the stepping stone of our dream project and company. SSGOLD Industries started with a small office space in 2012 as a importer and distributor of farming tools and spare parts . By 2017 became of the leaders in the farm implements and spare parts business in eastern India catering to the need of small and marginal farmers with land holding size of less than 5 acres. Post becoming one of the pioneers in the after market spare parts business SSGOLD explored new avenues and started providing the spare parts in their economical series under the brand name SUPREMOTO which has played a significant role in helping and supporting the OEMS and after market dealers of farm machineries and equipments. With its success in eastern India we are planning to expand our operation in all parts of India in coming years with adding more technological and efficient product range to bring a smile on each Indian farmer and make them a part of our family with a sole objective of HAGING FARMING FACE OF INDIA.

✉ meeta@udyogi.net

<http://udyogiagri.com/index.php/overview/>

**CONTACT : Ms. MEETA RANI PATRA**

**ACTIVITY :** Founded in 1982, Udyogi has been a pioneer in PPE & Industrial Safety Solutions in the country. We ventured into the Agri business in 2011 by manufacturing world-class Cylindrical Drippers. Over the years, we have added to our product portfolio in Agri such as Flat Drippers , Screen , and Disc Filters . All these products are manufactured in-house using cutting-edge technology and world-class equipment as well as infrastructure.

Indian economy is predominantly agricultural. According to the government's directives, we need to boost our yield per hectare. This target has created a huge requirement for drip irrigation facilities. We have increased our dripper manufacturing capacity and set it at 100 crores annually. We focus on building value-added and highly advanced solutions for the drip irrigation industry worldwide. With its continuous innovation, Udyogi Agri constantly strives towards achieving excellence in this space.

Udyogi has a strong presence across the country along with a sales team spread across India. Leading towards organizational excellence through comprehensive drip irrigation solutions and services has always been an insignia in our culture. Rising to the task of attaining distinction, all our teams across all divisions combine their knowledge and expertise to take Udyogi to newer heights.

Today, we boast of building an array of world-class Agri-solutions that offer great customer benefit & became a popular choice amongst users. The market has truly embraced the motto of More Crop Per Drop & generated high demand for Udyogi Agri Products.

We are a knowledge-driven organization where our growth in the drip irrigation industry is pegged on collective continuous research and innovation. Our excellent product quality is a result of lean thinking and a strong corporate structure powered by outstanding human capital. The knowledge of our team members combined with new ideas and current technology trends enables us to configure the optimal solution for all drip irrigation needs.

At Udyogi, we empower our workforce to do extraordinary things with their ingenuity and agility. As an organization, we aim to prioritize innovation. We are now keen to make innovation' the language, the behaviour definer, the culture, and the soul of the entire organization.

Years of experience in this industry have endowed us with the insights to better understand the needs of both the drip-line producer and the end-user. This adds an extra edge to our state-of-the-art production lines that cater to the diverse and complex demands of our customers while addressing all market needs.

Our products show what cutting-edge innovation can achieve. Our product line shows excellent quality, durability & longevity. Udyogi Agri is the effect of continuous innovation that is working for humanity.

✉ [ravindranathj@zentronlabs.com](mailto:ravindranathj@zentronlabs.com)  
🌐 [www.hortisort.com](http://www.hortisort.com)

CONTACT : Mr. Ravindranath

ACTIVITY : Zentron Labs is a Bangalore based technology company founded by IITians. Zentron has developed India's first commercial scale high speed optical fruit grading and sorting system- Hortisort. Hortisort grades and sorts fruits and vegetables based on color, size, shape, defects and weight at processing capacities upto 10 fruits/sec/lane and scalable as per requirement. Zentron automates the processes that require visual checking. We use industrial cameras in conjunction with Computer Vision algorithms to deliver innovative and custom Machine-Vision solutions using artificial intelligence and machine learning that perform automated visual inspection.

Grading adds value and helps farmers get better prices for their produce. Currently machines have been successfully deployed in pack houses on commercial scale machines for grading Kinnows in Punjab and Nagpur Oranges in Maharashtra
